# OSHA Orientation Training

A web-based safety program to help keep you OSHA compliant.

## Real Results

Each of your employees contribute to the overall safety of your company, which prompted the development of OSHA Orientation Training, a web-based training program to help keep you OSHA compliant.\*

OSHA Orientation Training offers the flexibility to get your new employees trained quickly and effectively. The program makes documentation simple. And studies show that students who utilize web-based training have a higher retention rate than regular classroom training.

Gibson's OSHA Orientation Training is cost-effective. Our program will reduce training costs and increase efficiency by allowing you to train new hires independently of each other, at a time that's most convenient for you.
